Tutorial 7

~~4) Convert the following grammar~~

1) Give Right Linear & Left Linear regular grammar for the following DFA

Hence, derive string "abababbab" using right linear as well as left linear grammar

2) Consider the Context Free Grammar

$$S \rightarrow (S)S \mid \epsilon$$

Give i) Leftmost derivation, Rightmost derivation and derivation tree for string "(())()"

3) Determine CFL for the grammar

$$S \rightarrow AB$$
$$A \rightarrow aA\,bb \mid abb$$
$$B \rightarrow cc\,B\,d \mid c$$
